

# Photovoltaic increases energy storage

## Overview

---

Solar and battery storage continue to dominate growth among energy sources, while fossil fuels and nuclear power have stagnated. As a leading authority in the sector, CNTE (Contemporary Nebula Technology). The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. Much of NLR's current energy storage research is informing solar-plus-storage analysis. Energy. Solar photovoltaic (SPV) materials and systems have increased effectiveness, affordability, and energy storage in recent years. And it is precisely this ability to "store the sun" that is making storage a valuable ally for those seeking energy.
