

# Photovoltaic industrySolar power generation

## Overview

---

The Solar Power industry in the United States operates under the NAICS industry code 22111e. Operators in this industry own and operate solar-power-generating facilities, such as photovoltaic panels or solar thermal power stations, that use mirrors or lenses to concentrate the sun's . In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2. China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y. The IEA reported Pakistan's rapid rise to . The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. Major companies include diversified electric utilities and independent producers Berkshire Hathaway Energy, NextEra Energy, Pacific Gas and Electric, Southern California Edison . Modern solar energy development in the United States dates back to 1954 when scientists at Bell Laboratories patented the first silicon solar cell. Each presentation focuses on global and U. 36 billion by 2032, exhibiting a CAGR of 6% during the forecast period.

## Photovoltaic industry Solar power generation

---

### Solar Power Generation Industry Profile from First Research

Current, comprehensive coverage of the Solar Power Generation Industry. Includes: industry forecasts, trends, financial information & detailed analysis. Updated 11/24/2025.

### Solar Power in the US Industry Analysis, 2025

The Solar Power industry in the United States operates under the NAICS industry code 22111e. Operators in this industry own and operate solar-power-generating facilities, such as photovoltaic

### Global Market Outlook for Solar Power 2025-2029

Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's share rose to 7% in

### Solar photovoltaic industry in the U.S.

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

### Solar Power Market Size, Share, Trends , Growth Report [2032]

The Solar Power market in the U.S. is projected

### Spring 2025 Solar Industry Update

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market,

to grow significantly, reaching an estimated value of USD 103.96 billion by 2032, driven by the need to combat climate change through

### Solar Market Insight Report Q4 2025 - SEIA

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating

### Quarterly Solar Industry Update

The International Energy Agency projects significant growth for photovoltaics (PV) in 2024 over the record-breaking year in 2023. Over the next two years, virtually all new electric

### The Outlook for Global Solar Energy Continues to Be Bright

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global

### Today in Energy

We expect solar electric generation will be the leading source of growth in the U.S. electric

power sector. In our January Short-Term Energy Outlook (STEO), which contains new forecast data
