

Photovoltaic panels exempt from export inspection

Overview

Export License: Photovoltaic modules themselves generally do not require an export license, but if they involve energy storage components such as lithium-ion batteries, it is necessary to check the "Export License Management Goods Catalog (2025)". On January 23, 2018, USTR announced that the President had approved recommendations to provide relief to U. International . On February 4, 2022, the President signed Proclamation 10339 "To Continue Facilitating Positive Adjustment to Competition from Imports of Certain Crystalline Silicon Photovoltaic Cells (Whether or not Partially or Fully Assembled into Other Products)" under Section 201 of the Trade Act of 1974 . Solar photovoltaic (PV) manufacturing involves making a wide variety of products and materials across several manufacturing steps, often done in different locations. In the United States, there are two leading types of solar panels: cadmium telluride (CdTe) and crystalline silicon (c-Si). The affected solar . Heading 85. 40 (photosensitive semiconductor devices, including photovoltaic cells whether or not assembled into modules or made . The Biden Administration today put imported bifacial solar panels back under Sec. 201 tariffs, after the specialty solar panels enjoyed a two-year exemption from extra duties first initiated by President Biden in 2022.

Photovoltaic panels exempt from export inspection

Bifacial Solar Panels Subject to Section 201 Duties

President Biden issued Proclamation 10779, ending the exemption from Section 201 duties on bifacial solar panels imported on or after June 26. Find out if your products are affected.
