Spain & Portugal: Galp Breaks Ground on 147MWh Grid-Forming

Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to the

[Iberdrola starts adding 180 MWh of BESS at solar farms in Portugal](#)

Spanish utility Iberdrola SA (BME:IBE) said it has launched the installation of battery energy storage systems (BESS) with a combined capacity of 180 MWh at two solar farms in Portugal.

[Supercapacitor Prices in Portugal: Cost Analysis & Market Trends for](#)

As Portugal accelerates its renewable energy transition, supercapacitors for energy storage have emerged as a critical solution for industries ranging from solar farms to electric vehicle charging

Portugal Invests in Grid Battery Storage for Solar Growth

Introduction: Policy Push Accelerates Battery Energy Storage Systems (BESS) The government of Portugal is investing EUR60.25 million through its Recovery and Resilience Plan (PRR)

Electricity storage in portugal

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

[Two hybrid projects with more than 630 MWh of battery storage](#)

Two hybrid projects with more than 630 MWh of battery storage planned in Portugal Lightsource bp is planning an 867 MWp solar and 300 MWh battery energy storage system (BESS)

[Iberdrola advances battery storage at the Alcochete and Algeruz solar](#)

Iberdrola Portugal, a subsidiary of the Iberdrola Group in Portugal, has begun installing battery energy storage systems (BESS) at the Alcochete I and Algeruz II solar plants, located in the

Energy Storage Roadmap in Portugal

Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target. Storage facilities can effectively deliver essential voltage and frequency

ELECTRICITY STORAGE IN PORTUGAL

This strong renewable performance highlights the growing need for energy storage solutions, which will be critical to achieving a resilient and sustainable energy transition.

Energy Statistics

The collection, production and dissemination of energy statistics is a competence of the Directorate of Energy Planning and Statistics (DSPEE) and follows a pre-established and published timetable.
