Battery electric vehicle

OverviewHistoryTerminologyVehicles by typeTechnologyEconomyEnvironmental impactBarriers to adoption

A battery electric vehicle (BEV), pure electric vehicle, only-electric vehicle, fully electric vehicle or all-electric vehicle is a type of electric vehicle (EV) that uses electrical energy exclusively from an on-board battery pack to power one or more electric traction motors, on which the vehicle solely relies for propulsion. This definition excludes hybrid electric vehicles (HEVs; including mild, full and plug-in hybrids

Pure Watercraft Electric Pontoon Boat Powered By GM Battery

Called the Pure Pontoon Boat, this watercraft is nearly 26 feet long, and built to accommodate up to 10 passengers at a time. Power comes from GM battery packs with a capacity of

Pure Watercraft reveals new battery pack for electric motor

The new pack was designed in-house, using lithium-ion cells from Panasonic. When combined with the company's Pure Outboard motor, the battery is said to provide more power per

Pure Watercraft releases new marine propulsion battery pack

It was designed in-house, using industry-leading lithium-ion cells from Panasonic. This battery pack, combined with the lightweight and powerful Pure Outboard motor, provides more than

Why hybrids are outselling pure EVs

Something interesting happened in the car market over the last year or two. Battery electric vehicles got a lot of the headlines. But hybrids are the ones actually flying off dealer lots. In 2025

Electric Pontoon Boat packs General Motors battery power

Known simply as the Electric Pontoon Boat, the watercraft measures 24 ft, 7 inches in length (7.5 m) and is able to carry up to 10 passengers. Buyers can choose between single or twin

[Pure Watercraft Unveils All-Electric Pontoon Boat Powered By GM Battery](#)

GM automotive battery pack in Pure Watercraft's pontoon boat can significantly reduce emissions, create quieter operation and improve performance.

Pure Outboard Motors , The Future of Marine Propulsion

The Pure Battery Pack provides the most energy per pound of any marine battery pack. Built with industry-leading lithium-ion cells, it delivers instant power from a lightweight pack, enabling faster

[High Rate Max Battery Specifications , PDF , Volt , Electric Current](#)

It lists 12V battery models ranging from 90 to 1000 watts, with features including absorbent glass mat technology, a 10-year design life, flame arresting vents, and UL recognition. Technical data includes

Outboard motor

Our patented Pure Watercraft Battery Pack system delivers the most energy per pound of any battery pack in marine, and typically greater energy per pound as the battery packs of the best electric cars.
