

# Quality of generators in the Democratic Republic of Congo Electric Power Station

## Overview

---

Revised in September 2023, this map provides a detailed view of the power sector in DR Congo. The locations of power generation facilities that are operating, under construction or planned are shown by type - including liquid fuels, natural gas, coal, hybrid . The modern substation for the Inga I and II power plants on the Congo River significantly stabilises the electricity supply. The electricity supply in the Democratic Republic of the Congo is unreliable and does not cover demand. This initiative is anticipated to boost Congo's electricity production capacity, addressing power shortages that have previously impeded the nation's . Recognising the increasing power demand in the DRC, an electrical sub-contractor has decided to also stock generator sets. The Government's strategy seeks to provide .

## Quality of generators in the Democratic Republic of Congo Electric P

---

### Congo Democratic Republic , Africa Energy Portal

The Democratic Republic of Congo (DRC)'s national energy policy is currently being finalised. The Government's strategy seeks to provide abundant, affordable, and environmentally friendly electrical

### Reliable electricity supply thanks to digitalisation

The electricity supply in the Democratic Republic of the Congo is unreliable and does not cover demand. The energy from the two largest hydropower plants on the Congo River was not

### Unicompex Power Solutions Emergency power in the DRC

In the DRC and the Republic of Congo, Unicompex offers reliable, energy-efficient FG Wilson diesel generator sets (6.8 to 2,500 kVA), manufactured to the most stringent British standards

### DRC: Increase in energy demand drives market for

Recognising the increasing power demand in the DRC, an electrical sub-contractor has decided to stock generator sets.

### [KfW digitalises DRC substation to better connect power from the Congo](#)

Two power plants on the Congo River, with installed capacity of more than 1.7GW, are the country's main energy suppliers - they alone generate 90% of the electricity consumed in the capital

### [A Hybrid Photovoltaic/Diesel System for Off-Grid Applications in](#)

To confirm the widespread applicability of converting pure diesel generators in Lubumbashi into such hybrid systems, we analyzed the effects of incorporating a photovoltaic (PV)

### [DR Congo president inaugurates Chinese-built hydroelectric plant](#)

During the inspection, the Congolese president commended the modernity and quality of the plant. In the control room, Tshisekedi pressed the main operating button of the generator, which

### [DR Congo electricity infrastructure map shows country's power](#)

Revised in September 2023, this map provides a detailed view of the power sector in DR Congo. The locations of power generation facilities that are operating, under construction or planned

### **World Bank Document**

Despite the considerable potential of DRC's hydropower and solar resources, its energy sector is characterized by very low electricity access, weak regulatory and implementing

institutions, and

### [Congo Accelerates Power Sector Expansion with Gas, Renewables](#)

Electricity access in the country remains limited, with approximately 49% of urban areas and 12% of rural regions connected to the national grid. This disparity underscores the need for
