

# Ready rack solar racking cost

## Overview

---

Solar racking is a vital part of any solar installation, but represents only a small percentage of total system costs--right around 3%, according to the National Renewable Energy Laboratory (NREL). Concrete-free foundations allow for a 10kW system to be installed in as little as 4 hours, without the need for specialized equipment. The Ready Rack™ system is built for flexibility - from large utility-scale arrays to small residential installations and everything in between. Its straightforward hardware configuration allows contractors to move quickly in the field with adjustable features already built in, and for projects that . The idea to use cheap pipe or rebar driven into ground vertically as support with custom made brackets which can be made for a \$1 each. Probably least amount of steel per panel. Too bad there is not pricing info on the site. I made the mistake of inquiring once. You can pick from our pre-determined rack system sizes here, or reach out if you need a ground mount solar . Our UL 3741 listing means you can install without MLPE devices.
