## Overview

---

This paper establishes three revenue models for typical distributed Photovoltaic and Energy Storage Systems. In order to make the operation timing of ESS accurate, there are three types of the relationship between the capacity and load of the PV energy storage system: Power of a photovoltaic system is higher than load power. Much of NLR's current energy storage research is informing solar-plus-storage analysis. NREL/TP-7A40-87303. This work was authored in part by the National Renewable Energy Laboratory, operated by Alliance for Sustainable .
