

# Return on Rural Solar Power Generation

## Overview

---

Department of Energy (DOE) study projects solar energy to rise from 4% of our nation's total energy production to 45% by 2050, potentially requiring nearly 10.4 million acres of land in solar production. This is about 30% larger than the state of . Research from a 2021 U. Michele Boyd is the program manager of the Strategic Analysis and Institutional Support team in the Solar Energy Technologies Office (SETO). The team supports the development of analysis, tools, and data resources to reduce the non-hardware (soft costs) of solar energy and accelerates learning .
