

# San Jose Communication Base Station Lithium-ion Battery Standard

## Overview

---

Recommended practices for system design, storage, installation, ventilation, instrumentation, operation, maintenance, capacity testing, and replacement of Li-ion batteries are provided in this document. High-Rise Multifamily buildings and some nonresidential building categories are prescriptively required to have a battery energy storage system. Performance compliance credit is also available for all building types. While the principles covered in this document apply to all stationary standby and cycling . The California Building Standards Law establishes the California Building Standards Commission within the Department of General Services. Although conventional battery chemistries, such as lead acid . APPROVED FOR PUBLIC RELEASE; DISTRIBUTION UNLIMITED UNIFIED FACILITIES CRITERIA (UFC) Any copyrighted material included in this UFC is identified at its point of use. Use of the copyrighted material apart from this UFC must have the permission of the copyright holder.

## San Jose Communication Base Station Lithium-ion Battery Standard

---

### **UFC 3-520-05 Stationary Battery Areas; replaced by UFC 3-520**

Provide technical requirements for enclosed battery areas. Address multi-discipline requirements for battery area layout and design. This document addresses architectural, electrical, mechanical, civil,

### **U.S. Codes and Standards for Battery Energy Storage Systems**

This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States.

### **White Paper on Lithium Batteries for Telecom Sites**

This white paper provides an overview for lithium batteries focusing more on lithium iron phosphate (LFP) technology application in the telecom industry, and contributes to ensuring safety across the

### **Batteries , CPSC.gov**

High-energy chemistry batteries include lithium ion, lithium ion polymer, and lithium metal batteries that are thinner, smaller, and lighter weight and contain more energy than traditional rechargeable and

### **Battery Energy Storage Systems**

[Telecom Base Station Backup Power Solution: Design Guide for 48V](#)

Discover the 48V 100Ah LiFePO4 battery pack for telecom base stations: safe, long-lasting, and eco-friendly. Optimize reliability with our design guide.

[SB 1152: State Fire Marshal: fire safety: regulations: lithium-based](#)

The bill would require these updates to address the specific environments in which communications utilities are required to deploy the lithium-based battery systems in order to meet

To qualify, the battery energy storage system shall be certified to the Energy Commission according to Joint Appendix JA12. Please visit the Solar Equipment List webpage for certification instructions, as

**Lithium Battery Storage and Handling , UpCodes**

Storage and handling of more than 9,000 pounds of lithium batteries per fire area shall be in an approved Group H, Division 2 occupancy constructed in accordance with the Building Code and

[Construction standards and requirements for lithium-ion batteries](#)

Many organizations have established standards that address lithium-ion battery safety, performance, testing, and maintenance. Standards are norms or requirements that establish a basis for the

## IEEE SA

Recommended practices for system design, storage, installation, ventilation, instrumentation, operation, maintenance, capacity testing, and replacement of Li-ion batteries are
