

Selling solar power generation

Overview

This guide explores how you can benefit financially from selling unused electricity through net metering and feed-in tariff programs, highlighting the opportunities available in various states. Turning your solar installation into an income generator is a compelling aspect of solar . Self-consumption beats exports - Maximizing the solar electricity you use directly in your home typically provides better financial returns than exporting excess to the grid, especially with time-of-use rates and battery storage becoming more common in 2025. Many people wonder whether or not they are able to sell energy back to the grid, especially with the . According to the Solar Energy Industries Association (SEIA), properly configured solar systems can generate 25-40% excess energy during peak production, creating substantial savings or income through utility buyback programs. It also covers energy compensation schemes. Our NSC program is based on this bill. In return, you earn credits that can lower your utility .
