

Solar Generator FAQ

Overview

Yes, a solar generator can power a house depending on its size, your energy demands, and how it's integrated into your home's electrical system. Aside from being a carbon-free power source, the sun shines down on us for free, so we might as well take advantage of it. These innovative devices harness the sun's rays to provide clean, renewable electricity for various applications. All content is reviewed by certified solar engineers and energy experts. The inverter then converts the battery's stored DC energy into AC. Please note, comments need to be approved before they are published.
