

Solar glass failed

Overview

Dual-glass PV modules are experiencing low-energy glass fracture under expected conditions of use at an alarming rate. In a feature article for PV Tech Power (Q3 2025), David Devir, principal engineer for VDE Americas, looks at the origins of today's supersized PV module glass problem and considers . Once considered isolated incidents, spontaneous glass breakages in solar modules are becoming more frequent, highlighting the limits of some manufacturing choices and the need for closer quality control. The hail impact resistance test, which is part of Kiwa-PVEL's PQP testing protocol, highlighted . These breakages can be due to many reasons and no single factor bears the sole responsibility of operators' woes. In this episode, Nico sits down with Tristan Erion-Lorico (Kiwa PVEL) and Dr. Teresa Barnes (NREL) to break down why 20% of modules fail reliability testing due to gl.
