

Solar module exports rise

Overview

Data from the Commerce Ministry show a 30.7% rise in India's solar module exports between April and October 2025, with values increasing by \$219.5 million and 30 per cent in volume terms to 4. Updated figures show a persistent growth trajectory, driven by strong demand in emerging markets that . Monthly photovoltaic module shipments, 2006-2024 Year and month Total shipments Value Average value (peak kilowatts) (thousand dollars) (dollars per peak watt) 2006 320,208 \$1,120,728 \$3.49 2009 1,188,879 \$3,316,972 \$2.80 Industry . Beijing's decision to eliminate solar export VAT rebates tackles deep structural problems: massive oversupply, unsustainable pricing, and growing trade tensions. Our analysis covers the rationale .

Solar module exports rise

[India's Solar Module Exports Surge in Late 2025 as Global Demand](#)

India's solar manufacturing industry is witnessing a major boost as module and cell exports surged sharply in Q3 and Q4 of 2025, driven by rising global demand for non-Chinese suppliers.

Solar Module Exports Surge Twenty Percent to \$668 Million ,

India's solar module exports surged 20.5% year-on-year to \$668 million during the first four months of the current fiscal, while shipment volumes rose 30% to 4.6 million units. Increased exports

[Solar Modules Export: Solar Module Exports Surge 20% to \\$668 mn.](#)

Export of solar modules up 20% at \$668 mn, led by rush of shipments to US Multiple factors including deadline for projects availing tax credits in the US and increase in shipments before

[India exported solar modules worth \\$782 million in April-Nov. period of](#)

India's exports of solar PV modules have steadily risen over the last few years. In FY 2021-22, the nation exported PV modules worth around \$83 million, which rose to around \$1,969

A 34% increase in China's solar panel exports meets growing

Exports of solar panels from China grew by 34% in the first half of 2023, with 114 GW shipped worldwide, compared to 85 GW in the same period last year.

China solar exports: Remarkable Rise Defies 2025 Curbs

In conclusion, China's solar module exports in 2025 tell a story of adaptation and enduring strength. Despite internal and external pressures to manage oversupply, the industry

2024 Monthly Solar Photovoltaic Module Shipments Report

Note: Includes both domestic shipments and exports. Monthly data for 2021- 2024 are based on a subset of the largest manufacturers representing about 90% of the previous year's total shipments.

[China Cancels PV Module Export Tax Rebates April 2026 . Analysis](#)

China eliminates solar export tax rebates effective April 1, 2026. Module prices forecast to rise 10-15%. Get the complete analysis and pricing outlook.

India's solar PC modules' exports rise 30.7% in 1st half of

India's solar module exports rose 30.7% in April-October 2025, driven almost entirely by US

demand, with emerging traction in new secondary markets across Asia, Africa, and beyond.

Indian solar PV exports surging , IEEFA

The export value of PV modules from India increased by more than 23 times in just two years between FY2022 and FY2024. Several factors have contributed to this rapid increase in PV
