

Solar module prices hit a new low

1075KWHH ESS

Overview

US solar PV module prices have stabilised at just over US\$0.28/W in the three months to November 2025, but this is likely to be a fragile state of affairs as a decision on Section 232 compliance looms over the US solar sector. 28/W, ending years of dramatic fluctuations as supply-demand dynamics rebalance and weak suppliers exit the market. TOPCon Technology Dominance: TOPCon modules have . Data from EnergyBin and Buckstop shows used solar modules made up just 1% of resale listings in 2025, as falling prices for new panels weaken reuse economics. From pv magazine USA Given that modules from the early 2010s solar boom are nearing the end of their expected lifespans, it's no surprise . Median solar module pricing in the United States reached \$0.28 per watt as the market adjusted to intensified trade enforcement and new Foreign Entity of Concern compliance requirements, according to the Q1 2026 Quarterly Pricing & Domestic Content Report from Anza. Image: Leeward Renewable Energy. This downward curve hit a bump in 2020. At the time, analysts said the price .
