

# Solar power generation shows no grid

## Overview

---

If no solar activity is noted, it may indicate your system isn't properly tied to the grid. These tools often provide real-time data, such as energy production and grid export details. Whether you are using a rooftop solar system, a portable power station, or a solar generator, understanding the causes of power loss is essential for proper . Real-world performance expectations: Solar panels typically achieve only 75-85% of their rated capacity under normal conditions due to temperature effects, inverter losses, and varying weather patterns-this is completely normal and not a sign of system failure. Soiling is the #1 culprit: Dirt . We recently had an extended grid down event during the daytime and I noticed that my house was getting power from the Powerwall-the app didn't show any power coming from my panels to my house. The load from the house was minimal (~1 kW) and my panels can produce around 8 kW peak, so I expected to . My Givenergy Gen 3 5kW inverter and 9. 5kW batter together with 15 panels was installed about 6 weeks ago. The system also includes Tigo CCA monitoring for each panel. Before you panic or immediately call a technician, there are several simple troubleshooting steps you can .

## Solar power generation shows no grid

---

### No power from panels when grid is down?

Hi all! I have a Powerwall 2 and a Span hooked up to my rooftop solar array. We recently had an extended grid down event during the daytime and I noticed that my house was getting power

### Why Is My Solar Not Generating Power?

This guide explains the most common reasons why your solar panels may not be generating power, and how to troubleshoot both rooftop systems and portable solar generators used

### App shows no solar panel energy production : r/TeslaSolar

A place to discuss Tesla Solar Panels, Solar Roof, Power Wall, and related gear. If you're into solar energy, tesla, or cool technology, this is the place for you!

### How Do I Know if My Solar Panels Are Connected to the Grid?

If you are moving into a home with solar panels, and you are not sure if the panels are tied to the local utility's electrical grid - or if you just want to ensure your grid-tied solar system is

### Why Are My Solar Panels Not Producing Enough Power? Complete

Discover the 12 most common reasons your solar panels underperform and get step-by-step

solutions. Expert troubleshooting guide with safety tips included.

### [Solar system not working? Identify and fix these common issues](#)

Knowing how to spot and resolve these issues early can help you maintain steady solar performance and avoid bigger problems down the line. This guide will walk you through the most

### [Tesla app showing no connection to home and PV only charging when off grid](#)

While flipping through the Tesla app I noticed that one of the solar panel inverters is not showing a link to the home or grid and the power graphs are in yellow rather than blue.

### [My Solar Panels Aren't Working! A Step-by-Step Troubleshooting Guide](#)

Waking up to discover your solar panels aren't producing power can be frustrating and alarming. Before you panic or immediately call a technician, there are several simple troubleshooting

### [Why Is The Grid Not Working? Causes And Fixes For Solar Inverter](#)

A solar inverter shows that the grid is not working when it fails to detect a stable and compliant utility connection. This occurs due to a grid power outage, inverter voltage levels outside the acceptable

### **PV generation stopped after smart meter**

## installation

Based on the fact that we replaced our meter, I would guess that the inverter is no longer connected to "the grid" / main panel at whatever tie point, and thus while perfectly capable of feeding
