

# **Solar power satellite factory in Cambodia**

## Overview

---

The first module has been produced by SolarSpace subsidiary L-Q New Energy at its new factory in Cambodia. Construction of the facility began during 2022. It covers some 30,000 square meters and will produce both cells and modules, with a capacity of 1. Cambodia's ambition to strengthen energy security and accelerate its transition toward clean power took a major step forward with the National Solar Park in Kampong Chhnang province, a 100-megawatt facility that began contributing to lower electricity costs and reduced reliance on imported energy . Cambodia has one of the highest solar energy potentials in the region. The country plans to significantly scale up capacity in the coming decades to strengthen the energy grid and reach its net-zero emissions goals. Kamworks core business is the . However, the once-thriving routine of her family and more than 500 other families in Kamphun commune began to change with the construction of the 400-megawatt Lower Sesan II dam, which became operational in December 2018 and altered the river flow and fish habitats. Now, the fishing practices that .
