

# Solar power stations in Egypt

## Overview

---

Egypt's Ministry of Petroleum and Mineral Resources shared its goal to construct two solar power stations valued at EGP 1 billion (\$20.60 million), funded by the European Union (EU). These projects show Egypt's big move toward using more renewable energy like solar power. This article lists power stations in Egypt. "Egypt: China's Green Energy Company Starts Construction of Biggest Solar Plant in . In the deserts near Aswan, Egypt the Benban Solar Park stands as one of the world's largest renewable-energy experiments - a massive solar ecosystem that behaves less like a single power station and more like a telecommunications network. With a total installed capacity of 1. The majority of this capacity is projected to be provided by the private sector, with several major projects contributing to supply. Of the total global . The solar energy is the most important source of energy on the globe, Egypt geographically lies between latitudes 22 and 31. In the village of Benban in Aswan, the largest .
