

# Solar power wage subsidy

## Overview

---

The solar ITC, often called the federal solar tax credit, provides a 30% dollar-for-dollar reduction on eligible solar installation costs. Net Metering is a solar incentive program where homeowners can be credited for power they send back to the electric grid. Every utility offers a different version of net metering (also sometimes called solar buyback), with credit amounts ranging from full retail electric rate value, to pennies on . If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.

- The Energy Department has compiled a comprehensive . Access the full content of the database in real time with the DSIRE API: <https://dsireusa.org/dsire-api/> DSIRE has teamed-up with EnergySage to help you go solar. No phone . Tax benefits are available to taxpayers who generate their own electricity from solar power generation systems whether the system is for personal or business use.

How to Claim The Credit  
Related Resources

You may claim the residential clean energy credit for improvements to your main home, whether you own or rent it. Your main home is generally where you live most of the time. The credit applies to new or existing homes located in the United States. You can't claim the credit if you're a landlord or other property owner who doesn't live in the home .See more on [irs.gov](https://www.irs.gov/SolarReviews)
