

Southern European energy storage battery project construction

Overview

Shovels are swinging at a 2-hectare (4.94 acres) site in the municipality of Castelnaud d'Aude where the company will install 51 battery modules near a grid connection point. The project marks Engie's first BESS in France.

Commissioning is scheduled for summer 2027, Engie said. In Spain, ENGIE is acquiring two Battery Energy Storage Systems (BESS) projects totaling 278 MW. With 700 MW of projects already in operation or under construction, the Group reaches more than 1 GW. French utility Engie SA (EPA:ENGI) said on Wednesday it has kicked off construction of a 110-MW/220-MWh battery energy storage system (BESS) in the Aude department, southern France.

According to the . Explore 2025 BESS projects across Europe, from Germany's Na-ion advancements to France and Spain's renewable energy storage initiatives. AI-generated illustration by Battery Technology. 8 GWh class and backed by reputable developers and public filings.

Discover the largest planned and under-construction battery energy storage projects in Europe as of mid-late 2025.

Engie turns sod on 110-MW/220-MWh BESS project in France

French utility Engie SA (EPA:ENGI) said on Wednesday it has kicked off construction of a 110-MW/220-MWh battery energy storage system (BESS) in the Aude department, southern France.

ENGIE Expands European Energy Storage Portfolio Beyond 1 GW

ENGIE is expanding its battery energy storage capacity in Europe, surpassing 1 GW with new projects in Spain and France. In Spain, they are developing two major BESS projects totaling

ENGIE advances nearly 400MW of BESS in Spain and France

France-based energy company ENGIE has acquired two BESS projects in Spain and started construction on its first BESS project in France, with a combined capacity of 388MW/1.2GWh of

2025 BESS Projects Transforming Energy Storage Across Europe

[Battery Energy Storage Stations in Southern Europe: Key Projects](#)

Summary: Southern Europe is rapidly adopting battery energy storage systems (BESS) to support renewable energy integration and grid stability. This article explores major operational projects,

Explore 2025 BESS projects across Europe, from Germany's Na-ion advancements to France and Spain's renewable energy storage initiatives.

ENGIE to expand European BESS portfolio in Spain and France

ENGIE has announced plans to expand its European battery energy storage systems (BESS) portfolio with the acquisition of two projects in Spain totalling 278MW and the start of

Engie Acquires 1.1GWh Of BESS With Synchronous Condensers In

Multinational energy company Engie has strengthened its presence in the European energy storage market by acquiring two large-scale battery energy storage system (BESS) projects in Spain

[ENGIE accelerates the deployment of battery storage with nearly 400](#)

With 700 MW of projects already in operation or under construction, the Group reaches more than 1 GW of BESS capacity in Europe. ENGIE is accelerating the development of Battery
