Southern Power Grid Solar Power Generation Application

[Southern Power expands Millers Branch Solar Facility in Texas](#)

Southern Power, a leading U.S. wholesale energy provider and subsidiary of Southern Company, today announced the expansion of its 29th solar project - Millers Branch Solar Facility.

Energy Portfolio Transition & Scenario Planning

Southern Power: A leading wholesale energy provider that develops, constructs, acquires, owns and operates power generation assets, including large renewable and energy storage portfolios, to

Southern Company Smart Grid Demonstration Project

This project intends to approach the Smart Grid in a fully-integrated systems approach across four retail operating companies: Alabama Power, Georgia Power, Gulf Power, and Mississippi Power.

Submit Documents for Smart Energy Solar for Business , SCE

Find all the documents needed to complete and submit an interconnection request. However, most contractors will facilitate this process for you. Once your application is complete and reviewed, you'll

Grid management and improvement projects

Discover the major power plants and generating facilities we're planning, siting and constructing to meet the Valley's energy needs. The Coolidge Expansion Project (CEP) will position SRP to meet

Home []

Southern Power builds the future of energy by investing in clean energy solutions for the customers we serve. Southern Power currently owns or operates more than 3,050 megawatts of solar generating

[Distributed photovoltaic power generation service guide of China](#)

Guide distributed in photovoltaic grid-connected applications, programme formulation and review, engineering design and construction of access systems and network elements such as

[Southern Company project will deploy GETs to get more renewables](#)

The project will jointly implement advanced power flow control (APFC) and dynamic line rating (DLR) technologies.

Ivanpah Solar Power Facility

Fields of heliostat mirrors focus sunlight on receivers located on centralized solar power towers. The receivers generate steam to drive specially adapted steam turbines. For the first plant, the largest
