

Specifications of new energy photovoltaic bracket

Overview

Detailed profile including pictures, certification details and manufacturer PDF. Detailed profile including pictures, certification details and manufacturer PDF. Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel and stainless steel. Adjustable installation angle from 0 ° to 60 °, achieving the best irradiation angle, compatible with different types of solar panels, meeting the horizontal or vertical requirements of solar panel modules. Concrete supports are mainly used in large-scale photovoltaic power stations. Because of their self-weight, they can only be placed and capacity, and adaptability to complex terrains. Designed for durability and precision, these brackets are engineered to withstand various environmental conditions, from extreme weather to long-term wear.
