

# Stored Energy Foam Fire Extinguishing System

## Stored Energy Foam Fire Extinguishing System

---

### FOAM SYSTEMS DESIGN & APPLICATIONS MANUAL

Solberg is a global company that is a one-stop resource for firefighting foam concentrates and custom-designed foam suppression systems hardware, offering both traditional and innovative firefighting

### TRI-MAX CAFS Products

Introducing the TRI-MAX 3 CAF Pack. Designed specifically for first responders working in the toughest conditions, the TRI-MAX 3 CAF Pack is easily handled by a single person. The TRI-MAX 3 CAF

### Stored-Energy CAFS

Faster Extinguishment and Greater Efficiency - CAF reduces surface tension dramatically, allowing rapid penetration and cooling. Studies and field tests show it extinguishes fires 3-10 times faster than

### [ECO CAF\(R\) Compressed Air Foam Systems , CAF Fire Extinguishers and Fire](#)

With our new, patent pending, ECO CAF advanced technology, our Compressed Air Foam systems are extremely powerful and lightweight. ECO CAF are better than traditional CAF as they are completely

### Compressed Air Foam , CAF Industrial

### **Enforcer 10**

Rosenbauer compressed air foam systems work simply, reliably and achieve an excellent extinguishing effect. In addition, CAFS technology can be implemented in a wide variety of forms and sizes.

The ability of the CAF generator to quickly expand and generate the foam proves to be the ideal solution for fire protection of fuel-stored external floating roof tanks.

### **COMPLETE BOOK dd**

Compressed Air Foam Units are self-contained and stored-energy having the added ability to inject compressed air into the foam solution generating a powerful fire attacking and suppression solution.

### **CAFS system & CAFS foam for firefighting**

Rosenbauer compressed air foam systems work simply, reliably and achieve an excellent extinguishing effect. In addition, CAFS technology can be implemented in a wide variety of forms and sizes.

### **Compressed air foam system**

It is proven that CAFS attacks all three sides of the fire triangle simultaneously. The foam blankets the fuel, thereby reducing the fuel's capacity to seek a source of oxygen. The CAFS solution adheres to

### **NFPA 11: Foam Fire Suppression Systems**

## Guide , US MADE SUPPLY

Foam fire suppression systems solve this by laying a blanket of foam over the fuel surface, smothering the fire and sealing off flammable vapors. NFPA 11, Standard for Low-, Medium-, and

## Enforcer 10

The Enforcer 10 is an extremely versatile 10 gallon portable firefighting system that utilizes high energy compressed air foam technology. EnforcerOne recommends using FIREBULL Fluorine Free
