

Tanzania electric vehicle policy

Overview

Battery electric vehicles (BEVs) are fully exempt from excise duties, but all EVs must undergo pre-shipment inspections to ensure they meet safety, environmental, and legal standards. Tanzania enforces an 8-year age limit on all imported vehicles, including EVs. However, VAT (20%) and import duty (25%) still apply. HIV . The Tanzanian government, in partnership with key stakeholders, has initiated discussions to formulate a national policy framework for electric vehicles (EVs). The workshop, held on December 17, 2024 . uels for economic and transport activities. Due to its rapid urbanization and increasing individual motorization, traffic congestion and air pollution have increased alongside GHG emissions. To address those issues, the Tanzania Commission for Science and Technology (COSTECH), in coordination with . At TAEMA, we believe that electric mobility is more than a technological shift - it is a national opportunity to transform the transport sector, stimulate green innovation, create decent jobs, and reduce carbon emissions. The operations are under a private firm, Dow Elef Auto EV (ZERA) Limited.
