

# Tee for connecting photovoltaic cable to inverter

## Overview

---

Connect the positive (red) cable from the panels to the inverter's positive terminal, and the negative (black) cable to the negative terminal. For over 40 years, TE Connectivity's (TE) SOLARLOK PV connectors have delivered simple, fast, reliable connections from solar modules to DC/AC converters. Selecting the appropriate cable affects not only electrical performance and energy yield but also system longevity and maintenance costs. In recent years, with the . But you have come to the right place to get the right kind of wire for your specific application. The wire (or conductors) listed below includes standard PV wire to connect the leads from the solar panels, or USE-2 or THHN conductors rated for home-run lengths from your array combiner box to your . So you've got your solar panels, inverters and other essentials, but what about the cables and connectors?

. [Show More > PV Wire 10 AWG Custom Lengths & Ends](#) [Click to Select Options](#). Pick up top-quality solar panel cables and connectors for your large or small solar setup at [The Inverter Store](#) . Connecting photovoltaic panels to inverter lines is the backbone of any solar power system. Whether you're a homeowner, installer, or renewable energy enthusiast, understanding this process ensures maximum energy harvest and system safety. This extension cable allows for flexibility in positioning solar panels for optimal sunlight exposure and energy .
