

Tesla global sales 2021

Overview

Tesla's global sales have grown exponentially since 2013, from 22,477 units to 1.33 million units) highlighted Tesla's dominance in the global EV market. In full-year 2021, Tesla sales, production, and global deliveries of new cars worldwide increased to over 930,000 electric vehicles. Tesla emerged as the market leader with a 14% market share, followed by Volkswagen with a 12% share and SGMW with an 11% global share. The demand for EVs was strong in China. Its first quarter of 2025 financial performance had already been impacted, with the manufacturer's net income dropping below the 500 million U. dollars benchmark for the first time since 2021. A huge part of the success comes from Tesla's sales which jumped 30x in the same time. The Tesla Model 3 was the first electric vehicle to surpass 1 million global sales in June 2021.
