

# The community uses a Korean energy storage battery cabinet with IP66 rating

## Overview

---

EnerOne can be used flexibly in outdoor applications, thanks to the protection level IP 66 of the main components and the adaptability to an ambient temperature range of -30 to +55 °C. It has passed various critical tests on the cell, module, and rack levels. Testing and certification. In today's energy storage market, the outdoor battery cabinet has become a decisive factor in whether a project thrives or struggles. A poorly chosen cabinet can . The IP rating, defined by the IEC 60529 standard, specifies the level of protection provided by an electrical enclosure against the entry of solid particles and liquids. Defined by IEC standards, IP66 offers full dust tightness and protection against . It has established long-term strategic partnerships with leading battery cell manufacturers and professionals with core technology and expertise in the battery field to jointly develop products It has established long-term strategic partnerships with leading battery cell manufacturers and . CATL EnerOne 372. The higher each number is, the higher the protection.
