

The length and width of Skyworth photovoltaic panels

Overview

While residential installations typically use 60-cell ($\approx 1.9\text{m}^2$) configurations, Skyworth offers customized solutions for commercial projects. Skyworth's product line follows the industry pattern where higher wattage generally requires larger dimensions: This size progression isn't linear - the 620W model's compact dimensions demonstrate how newer PERC cell technology achieves higher output without proportional size increases, much like .
