

The price increase game of photovoltaic panels

Overview

Wood Mackenzie reports a 9% solar price surge in Q4 2025. China's VAT rebate reduction, polysilicon consolidation, and lower factory utilization are reshaping the market. To protect margins, lock in pricing early, diversify suppliers, and adopt high-efficiency HPBC and ABC. Somewhere in the tumult of the global economy in recent months, solar panel prices hit bottom and then began to rise. The oversupply that helped to push prices down last year has eased a bit. Over the past two weeks, multiple industry analyses have confirmed a coordinated shift. In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry. Smart. The global PV market is experiencing significant growth, with an anticipated installation of 592 gigawatts of modules in 2024, representing a 33% increase from 2023. 2.28 per watt as the market adjusted to intensified trade enforcement and new Foreign Entity of Concern compliance requirements, according to the Q1 2026 Quarterly Pricing & Domestic Content Report from Anza. From pv magazine USA The US
