## The sound of solar: Noise in a sustainable world

On a solar farm, it is the supporting infrastructure, such as battery storage, transformers and substations, that produces noise. The significance of that audible noise is relative to the existing

### Presentation

While the sound power level of a source is fixed, the sound pressure level depends upon the distance from the source. Both are measured in dB so can be easily confused.

### Battery Energy Storage System Noise Reduction

Battery energy storage systems (BESS) can produce noise pollution that impacts the environment, and may even prevent the approval of these facilities being built. That's why it's important to utilize the

### [Battery Energy Storage System \(BESS\) Noise Challenges and Solutions](#)

Over the last few years, a new type of noise source has come to light as a significant environmental noise issue. Battery Energy Storage Systems (BESS) are relatively new to the US,
