

# Transnistria microgrid operation

## Overview

---

When winter storms knocked out 80% of regional power last December, TESRI's hybrid microgrid kept critical infrastructure online for 11 straight days. The secret sauce?

A three-phase response protocol combining: While TESRI's solutions were born from necessity, they're sparking . Russia is urgently ramping up operations in Moldova's Transnistria region - the so-called "PMR" - to divert Ukrainian resources toward the growing threat from the Russian enclave, NV sources said on Dec. Conscription measures have reportedly intensified in the so-called PMR: reservists are . With regional power outages increasing by 18% last quarter [1], this breakaway state has turned its energy vulnerability into a laboratory for cutting-edge solutions. Combine that with their ambitious 2024 . Transnistria's power generation mix reads like a Cold War relic: This setup works about as well as a chocolate teapot during peak demand seasons. According to Ukrinform, this information comes from a source in the Main Intelligence Directorate (DIU) of the Ukrainian . In 2018, a 100-MW chemical energy storage power station was constructed in the power grid to support peak and frequency modulation in Zhenjiang, Jiangsu.
