

Uzbekistan energy storage research and development

Overview

The ministry reports that the nation is proactively enhancing its energy storage framework to bolster the reliability of the national power grid. In 2024, two energy storage systems with a capacity of 150 MW each were commissioned in the Fergana and Andijan regions, bringing the . Uzbekistan plans to launch six additional energy storage systems with a total capacity of 884 MW in 2026, Trend reports via the Ministry of Energy of Uzbekistan.

Keywords: stations, power plants, natural gas. Since 2021, the country has added 10 new renewable plants, including nine solar and one wind facility, with a total capacity exceeding 2,500 MW, alongside over 2,200 MW from . Uzbekistan is scaling solar and other renewables, using innovative financing and partnerships to modernize its power sector and cut emissions.

Transitioning from fossil fuels to renewable energy is a complex challenge, especially for developing countries. Uzbekistan has acknowledged its heavy . Tashkent, Uzbekistan, May 21, 2024 - The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).
