

# What products can photovoltaic panels be used for

## Overview

---

Passive solar design, solar water heating, and solar photovoltaics are three critical applications for solar PV. However, when it comes to increasing productivity, reducing costs, and diversifying their energy supply sources, businesses and industry turn to solar technology. These cells absorb sunlight, release electrons, and create a direct current (DC) flow. But do you know there are . Here's a comprehensive list of 17 ways solar energy can be used at home or in business; including the most common solar powered products to help you live more sustainably. Cambridge, Massachusetts: MIT Press. Butti, Ken & Perlin, John (1980).
