

What to do if photovoltaic panels are too ugly on the roof

Overview

If possible, position panels on roof faces that are not directly visible from the street or neighboring homes. For ground-mounted systems, placing them in less conspicuous areas of your property, away from main sightlines, is an effective strategy. For example, a system that uses visible mounting brackets or electrical components can detract from . As a homeowner, solar panel efficiency and cost may not be the only two factors you're considering when deciding whether or not to go solar. Their purpose is to convert light into electricity, making high reflectivity an undesirable trait that would decrease efficiency. Brands like SunPower and Tesla have recognized the importance of solar aesthetics and have engineered their products to minimize the visual . You might also consider a ground mount over a roof mount to avoid the issue entirely. But here are some general tips.
