

Which high-frequency inverter has the longest lifespan

Overview

String inverters, the most common type for residential installations, usually operate reliably for about 12 years. Solar inverters last between 10 to 25 years depending on the type, with string inverters averaging 10 to 15 years and microinverters reaching 20 to 25 years. In this section, we will explore the various factors that influence an inverter's lifespan and what you can do to ensure your inverter lasts as long as possible.
